

Yacht Carbon Offset

Joint News Release

5 November 2013

EYOS Expeditions offers Yacht Carbon Offset option

EYOS Expeditions, the world's foremost provider of superyacht expeditions, announced that it is working with Yacht Carbon Offset to offer a greenhouse gas offset option to all its clients. This will enable each participating yacht's greenhouse gas to be counteracted while preserving cruising freedom, regardless of whether the yacht is sailing through the Northwest Passage or exploring the hidden atolls of the Seychelles.

EYOS Expeditions' Chief Executive Officer Ben Lyons said: *"EYOS organizes and leads luxury superyacht expeditions to remote, culturally rich and naturally wild locations, so our team of expedition leaders, guides and naturalists are deeply familiar with the most pristine wildernesses in the world. Our work introduces clients to environments that are exposed to the potential impact of climate change, be they coral atolls or polar ice-fields. Whether for charter clients or those who own their own yacht, it is natural for us to offer this service for those who would like to partake."*

Yacht Carbon Offset's Managing Director Mark Robinson said: *"We are already working with Hanse Explorer and Asteria- two of the expedition yachts that EYOS Expeditions supports- so we are delighted that EYOS' other clients will be made aware of our service, too. We look forward to contributing to all expeditions where those on the yacht expect the highest environmental standards."*

Yacht Carbon Offset provides a fully-documented service for those that own and enjoy the world's leading superyachts and has Lloyds Register Quality Assurance Certification. For details and to take action to balance your yacht's greenhouse gas emissions, visit www.yachtcarbonoffset.com

Notes for editors:

EYOS Expeditions

EYOS Expeditions is the world's foremost provider of superyacht expeditions and routinely guides private yachts to the most remote regions on Earth in safety & luxury.

Working closely with Captains, owners and those who charter an extraordinary vessel, EYOS delivers once-in-a-lifetime experiences in culturally rich or naturally wild locations. They build itineraries, acquire permits, arrange aviation services and gather a world-class expedition team.

EYOS' hard-won knowledge, gained through decades of exploring remote cruising areas and the contacts made along the way, will be an asset to any vessel setting off into the wilderness. They have successfully delivered several "world's firsts," including pioneering 'fly-in / fly-out' expeditions to Antarctica, securing permission for the first non-Russian vessel to visit Wrangel Island in over 60 years, and leading the world's largest unsupported vessel ever through the Northwest Passage.

Yacht Carbon Offset

Yacht Carbon Offset provides a clear, auditable way to counteract the carbon footprint of a vessel's engines and generators. Tonne for tonne, the yacht's emissions are offset by equivalent greenhouse gas reductions from projects such as renewable power. Each project depends on the carbon funding, and Yacht Carbon Offset has Lloyds Register Quality Assurance Certification, so clients know that their action makes a real impact on net emissions.

The "pay as you go" service is calculated from the fuel quantities specified, whether a single passage or for the whole season's cruising. There's no onboard equipment and there is no long term obligation for the yacht.

Carbon Offsetting is of potential interest to owners or charterers wishing to take practical steps to minimise environmental impact, and also may be welcomed by prominent individuals or businesses that carefully position their "brand". It is particularly relevant when cruising in environmentally sensitive areas.
