Ecstasea carbon offsets her fuel

M.Y. Ecstasea, the 86m Feadship superyacht, has introduced a policy of carbon offsetting her fuel, effective from 2009. Yacht Carbon Offset has worked through the yacht's Abu-Dhabi based managers Al Seer Marine to balance Ecstasea's carbon footprint.

Al Seer's Managing Director Alexander Drinkwater said *"The UAE is a fantastic superyacht destination, with the beauty of the Gulf waters and several excellent marina facilities, together with the luxury lifestyle ashore. Abu Dhabi is rapidly building its sustainable energy capability, and low carbon developments are a high priority for the Emirate. For the Owners of yachts such as Ecstasea that choose the UAE as a home base, a practical response to the vessel's greenhouse gas emissions makes perfect sense."*

Ecstasea's Captain Lee Mann commented *"Ecstasea takes pride in the highest standards of environmental performance, and a response to the yacht's greenhouse gas emissions is part of this. It is vital that carbon offsetting is done rigorously with proper audit records and we are pleased to be working with the specialists at Yacht Carbon Offset to put our decision into action."*

Yacht Carbon Offset's Managing Director Mark Robinson added: *"Ecstasea is amongst the most impressive superyachts afloat, and we are delighted that her Owner has decided to balance her carbon footprint. We are honoured to be part of her comprehensive environmental management programme."*

Yacht Carbon Offset provides a specialist service for those that own and enjoy the world's leading superyachts. The company has Lloyds Register Quality Assurance Certification. For more information and to take action to balance your yacht's greenhouse gas emissions, visit www.yachtcarbonoffset.com

Notes for editors:

M.Y. Ecstasea

Ecstasea, registered in George Town, was designed by De Voogt Naval Architects and Terence Disdale Design Ltd. and built in 2004 by Feadship. A powerful and luxurious yacht, she cruises at 22 knots, with a substantially higher maximum speed when driven by her combination of 4 MTU diesels and GE gas turbine.

Al Seer Marine

Strategically located in Abu Dhabi, the capital of the United Arab Emirates, Al Seer Marine is a leading superyacht services and marine company in the Gulf region. Its portfolio of services from yacht and marina management, to paint and refit services, caters for the needs of Owners, managers and crew.

Al Seer's team of highly trained professionals have many years of experience and bring together the highest level of work, state of the art technology and a proven track record of excellent operations.

Yacht Carbon Offset

Yacht Carbon Offset provides a clear, auditable way to balance out the "carbon footprint" of a yacht's engines and generators. Tonne for tonne, the yacht's emissions are offset by equivalent greenhouse gas reductions from projects such as renewable power. Each project depends on the carbon funding, and Yacht Carbon Offset has Lloyds Register Quality Assurance Certification, so Clients know that their action makes a real impact on net emissions.

The "pay as you go" service is calculated from the fuel quantities specified, whether from a single Charter or for the whole season's cruising. There's no onboard equipment and there is no long term obligation for the yacht.

Carbon Offsetting is of potential interest to Owners or Charterers wishing to take practical steps to minimise environmental impact, and also may be welcomed by prominent individuals or those that carefully position their "personal brand". It is particularly relevant when cruising in more environmentally sensitive areas.
