### Global introduces Yacht Carbon Offset

Motor Yacht Global, the versatile 67m explorer yacht, now includes the Yacht Carbon Offset service as part of her environmental procedures. Her Owners and Charter guests can now be assured that the greenhouse gas impact of the yacht's engines has been counteracted through our fully-documented system.

The yacht combines superyacht standards of luxury with long-range expedition capability including helicopter facilities, vast deck & interior areas to accommodate tenders, submarines, vehicles and heavy equipment, and a high capacity crane. Currently in Fort Lauderdale, she is ready for adventure and available for charter.

Kostas Andreou, Global's Captain commented: *"We are pleased to take a further step to improve our operations through Yacht Carbon Offset's focused service. This sport-utility yacht offers a platform to explore the world's most pristine destinations, so it is natural that the highest environmental standards must be met. Greenhouse gas emissions are a major concern today, so it is good to be able to take effective action in such a practical way."*

Yacht Carbon Offset's Mark Robinson said: *"Global's decision to carbon offset her fuel makes a real difference to the green energy projects that receive funding through our service. These projects reduce the consumption of fossil fuel for power generation, in order to balance out the combustion of fuel by the yacht. It is a proportionate response for this powerful vessel, and we thank the team aboard Global for their environmental leadership and for their decision to work with Yacht Carbon Offset."*

Yacht Carbon Offset provides a fully-documented service for those that own and enjoy the world's leading superyachts and has Lloyds Register Quality Assurance Certification. For details and to take action to balance your yacht's greenhouse gas emissions, visit [www.yachtcarbonoffset.com](http://www.yachtcarbonoffset.com)

## **Notes for editors:**

### **M.Y. Global**

M.Y. Global was re-launched in 2007 by Shadow Marine as a luxurious sport-utility explorer yacht.

Global's 10,000+ nm range, over-sized helicopter pad, 14.6 x 10.7 x 5.8m air-conditioned hangar, 35-ton deck crane and 6-ton hydraulic davit make her an excellent platform for ambitious expeditions.

The vessel combines these functional capabilities with versatile guest spaces appointed to full superyacht standards of quality. She has six staterooms with balconies, a 28 ft swimming pool, a movie theatre and a Gym.

### **Yacht Carbon Offset**

Yacht Carbon Offset provides a clear, auditable way to counteract the carbon footprint of a vessel's engines and generators. Tonne for tonne, the yacht's emissions are offset by equivalent greenhouse gas reductions from projects such as renewable power. Each project depends on the carbon funding, and Yacht Carbon Offset has Lloyds Register Quality Assurance Certification, so Clients know that their action makes a real impact on net emissions.

The "pay as you go" service is calculated from the fuel quantities specified, whether a single passage or for the whole season's cruising. There's no onboard equipment and there is no long term obligation for the yacht.

Carbon Offsetting is of potential interest to owners or charterers wishing to take practical steps to minimise environmental impact, and also may be welcomed by prominent individuals or businesses that carefully position their "brand". It is particularly relevant when cruising in environmentally sensitive areas.

Yacht Carbon Offset Limited is an independent UK company which launched its specialist service in 2008. It was delighted to be the winner of the 2011 International Superyacht Society Fabien Cousteau Blue Award. This Award celebrates stewardship of marine ecosystems and Yacht Carbon Offset was honoured to have been chosen by a distinguished panel of superyacht business leaders and marine environmentalist Fabien Cousteau.
