

Yacht Carbon Offset
www.yachtcarbonoffset.com

Counteract your
carbon footprint today

Aruba: Wind power, on east coast of Island
Verified to Gold Standard by Earthood Services

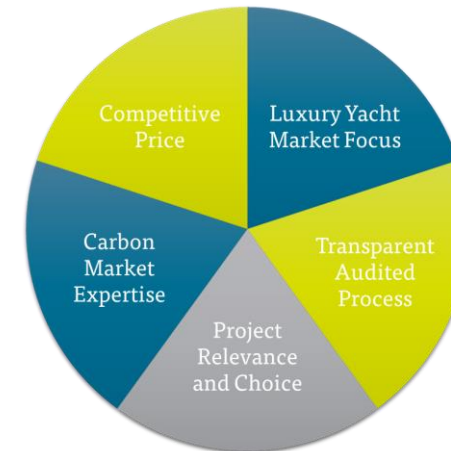

Mauritius: Solar power, western part of Island
Verified to VCS by Carbon Check Pvt. Ltd

Our Service

- We calculate the greenhouse gas (GHG) emissions from the quantity & type of emission sources that you specify (fuel, electricity, flights, ground travel etc.).
- We allocate GHG reductions from independently verified green energy projects to offset your emissions, tonne for tonne.
- We issue you with a personalised Yacht Carbon Offset certificate for each carbon offset transaction showing exactly which GHG emission sources have been included.

Why use Yacht Carbon Offset ?

Lloyds Register Quality Assurance Certification

Certificate: 1010698
Provision of carbon offset solutions to yachts, ships, other vessels, & associated businesses.

- Regular and detailed inspections by Lloyds' auditor
- Verifies allocations to yachts and project selection
- Includes entire documented system for service delivery
